

XPLOR MOLECULAR GASTRONOMY CREATION

- Filo pastry
- Heavy cream
- Fruits
- Syrups in various flavors to create a range of vibrant colors

Xplor Molecular baking is an incredibly exciting activity, especially when it comes to using syringes and tubes to create spaghetti with different flavors! The thrill of controlling temperatures and experimenting with techniques makes it an unforgettable experience, perfect for birthdays and private courses. Here, we teach these fascinating methods and guide participants in crafting a unique and creative dessert that's as fun to make as it is to eat. It's an extraordinary way to celebrate and discover the magic of food science!
